

# Malls Direct Replacements

**Engineering and Manufacturing Specialty HVAC Equipment  
since 1971**

4500 Industrial Access Road Douglasville, GA ; P 770-489-0716    [www.seasons4.net](http://www.seasons4.net)

# Malls Direct Replacements

The population is growing in every city in The United States. Malls are adding more small shops, food courts, and every 10 feet a KIOSK with computers, printers and one or two persons to operate the KIOSK. The Mall's 15- year-old HVAC systems can not handle the added load. Tenants are complaining, and people are hot.

The solution?

Seasons-4 will review all existing unit wire sizes and provide a direct replacement to maximize the existing wires. This usually amounts to a 20 to 30% capacity increase for each unit.

The change out starts on Saturday 9:00 pm after the mall is closed and continues till Sunday morning.

At 10:00 AM when the mall is open the units are in operation with higher capacities and everyone is COOL.

New units are more efficient, with the latest technology control system and a choice of R-407c, R-134a, R-410a, Refrigerant.

# **Meadows Mall Las Vegas, NV**

**Fourteen (14) 57 tons –105 tons DX cooling units**

**Existing unit is removed**
