100% outdoor air units with two sets of plate- type air-to-air heat exchangers. The outside air is precooled by both heat exchangers and then re-heated by the second heat exchanger after being conditioned thru the DX coils.

Condensing sections are provided with SWSI airfoil plenum blowers with VFD, scroll compressors with sound blankets and acoustical lovers for low sound levels, 407c refrigerant, lead/lag compressor rotation and hot gas bypass on all circuits.
