

Lower your energy bills.
Enjoy fresh air.
(All it takes is 8 hours.)

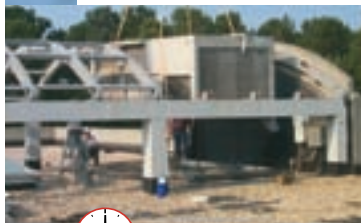

SEASONS 4™

Engineering and Manufacturing
Specialty HVAC Equipment Since 1971

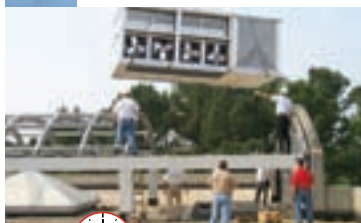

Better air flow. Year round comfort. Install the Seasons•4 system.

8:00am Saturday
Seasons•4 unit arrives.

9:00am Saturday
Old unit is removed.

11:00am Saturday
Seasons•4 unit lifted onto roof and placed onto existing footprint.

3:00pm Saturday
The Perfect RetroFIT. The new Seasons•4 unit matches your curb. It is custom pre-measured to adapt to the existing utilities and air ducts. It's ready to go to work.

Now your school can meet ASHRAE Standards for better ventilation and air quality. It's easy with a Seasons•4 custom-engineered HVAC roof top unit. Install your new unit in 8 hours or less, bring your school up to code, and drastically lower your energy bills.

The Perfect RetroFIT.

Unlike off the shelf brands, your Seasons•4 system is a direct replacement with the same footprint of your old unit. That means your new Seasons•4 multi-zone unit fits on your existing curb so all the air ducts and utilities remain the same. That alone saves you thousands of dollars. No electrical rewiring. No air ducts to change. Your custom Seasons•4 unit is the perfect retrofit that gives you 24/7 air quality and comfort.

Meets and Exceeds ASHRAE Standards.

If your rooftop unit is 10 years or older, you're not generating enough air flow through your system. New ASHRAE Standards for indoor air quality call for three times or more ventilation per student (15 CFM or higher). Most older systems fail to meet these higher standards.

A Seasons•4 multi-zone custom unit will bring your school up to code and immediately lower your energy costs. Best of all, with improved ventilation and air movement, you create a much better learning environment.

The Seasons•4 multi-zone system can be installed over a weekend in 8 hours or less so there's no disruption of classes.

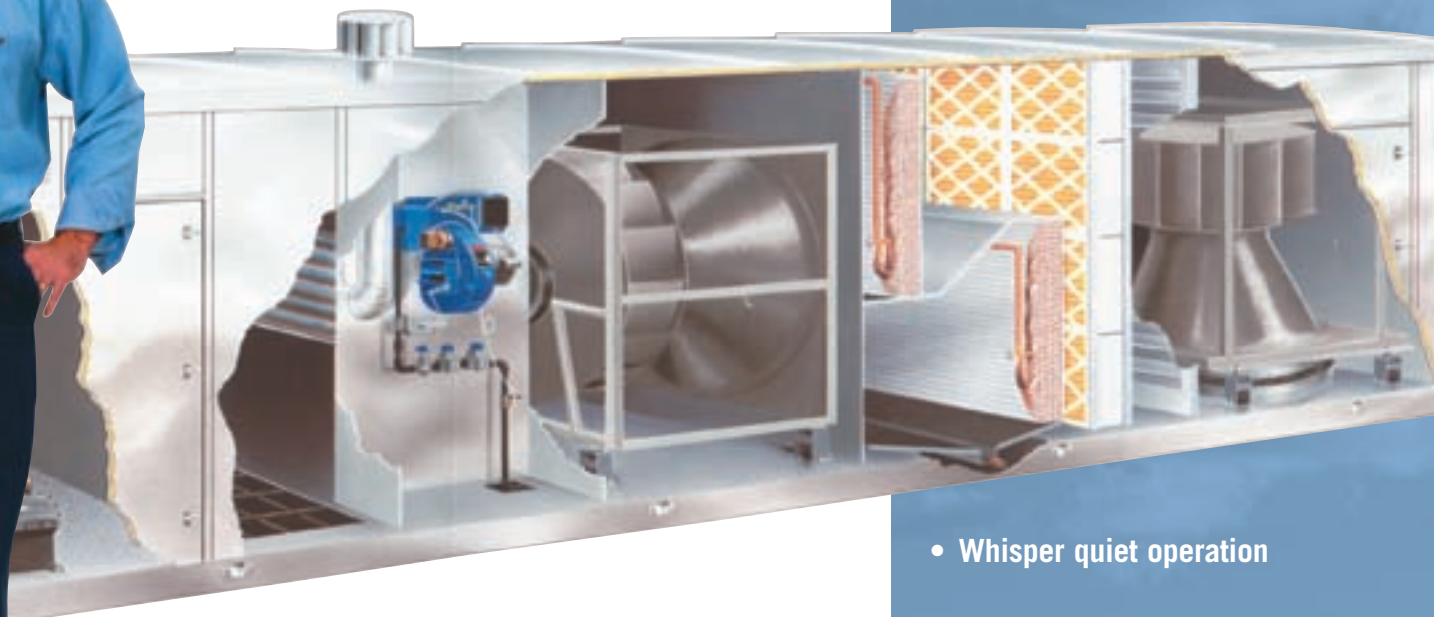

School HVAC is Our Specialty.

Seasons•4 is the world's #1 manufacturer of school replacement HVAC units. Over 30 years of experience ensures a long lasting, dependable system that will last for many, many years.

Exterior panels are aluminum so they'll never rust. Oversized condenser coils mean super-efficient operation. Heavy-duty compressors work hard to save energy. Air foil plenum supply and return fans with Premium Efficiency Motors maximize efficiency and provide additional savings. Walk-in access doors with single door handle simplify maintenance and service. And state-of-the-art controls deliver high performance at the touch of a finger.

Dollar for dollar, feature for feature, the Seasons•4 unit is the best investment in the HVAC industry.

The Seasons•4 unit is a "multi-zone" unit. You have the temperature flexibility to control humidity anywhere in the school. Kids are healthy. Parents are happy, and you save money.

Look at the Advantages

- Direct replacement unit is guaranteed to fit your existing footprint
- Turnkey installation in 8 hours or less
- Meets ETL, EPA, and ASHRAE Standards
- Lower humidity
- Superior IAQ (Indoor Air Quality)
- Ideal comfort and learning environment
- Lowers energy bills
- Saves on maintenance
- Whisper quiet operation
- Reduces moisture and the chance of mold and/or mildew
- Proven and successful track record for over 30 years

Seasons•4. The #1 company for school replacement HVAC systems.

Seasons•4 custom HVAC systems are operating in schools around the country. They handle the snow and ice in Chicago and the oppressive humidity of the Southeast. They conquer the blistering temperatures of the desert, and the dramatic daily temperature shifts that can occur in Texas.

We have dozens of examples of how Seasons•4 custom HVAC systems have helped school systems like yours. And we're delighted to share them with you.

If your current HVAC system is more than 15 years old, it probably needs replacing immediately. And even newer systems may not be providing the air flow and humidity control needed to meet new EPA guidelines and ASHRAE Standards.

A Seasons•4 representative can assess your current system and show you where you can start saving. Call today or visit our website.

Schools all over the country are saving with Seasons•4. This means better ventilation, superior IAQ, and lower energy bills.
